Profile

Motivated Computer Science graduate with a strong passion for coding and a commitment to continuous learning. Dedicated to professional growth while developing meaningful and efficient software solutions. Eager to explore emerging technologies and contribute to impactful, real-world projects.

Education

2021 – 2025
Bengaluru

Bachelor of Engineering in Computer Science and Engineering
RR Institute of Technology

2019 – 2021
Tumakuru

Pre-University Education
KVR Maruthi PU College (in association with Deeksha Integrated PU College)

2018 – 2019
Bengaluru

Secondary School Leaving Certificate
Ashok International Public School, CBSE

Skills

WEB TECHNOLOGY SKILLS

- Extreme knowledge on **HTML, CSS & JS**
- Strong knowledge on **Hoisting**
- Good knowledge on **DOM and BOM**
- Strong knowledge **JSON**
- Good knowledge **Asynchronous – call back, promises, Asyn and Await**.

PROJECT EXPERIENCE

- Built and deployed front-end applications using Web Technologies with **React**, **HTML**, **CSS**, and **JavaScript**.
- Implemented **RESTful APIs**, **authentication**, **CRUD operations**, and responsive UI with proper state management.

REACT JS SKILLS

- Strong knowledge of **React.js core concepts** – Components, Props, State, Lifecycle Methods
- Experience in **functional components** and **React Hooks** like useState, useEffect, useContext, useRef
- Good understanding of **component-based architecture** and **unidirectional data flow**
- Hands-on experience in **conditional rendering**, **list rendering**, and **event handling**
- Proficient in using **React Router** for **single-page application (SPA) routing**.
- Knowledge of **state management** using **Context API** and **Redux Toolkit**
- Hands-on experience integrating **REST APIs**

Projects

01/2025 – 03/2025

Advanced water quality monitoring system in pond management and environmental conservation
Developed an IoT-based water quality monitoring system for effective pond management and environmental conservation. Enabled real-time tracking to support timely interventions and ecosystem health.
Languages/Technologies Used: Python, C++, Arduino, IoT Sensors, ThingSpeak

06/2024 – 07/2024

Sign Language Detection using AIML
Developed a sign language detection system using AIML for real-time gesture recognition and translation. Utilized computer vision techniques to enhance accessibility.
Languages/Technologies Used: Python, OpenCV, TensorFlow/Keras, Computer Vision, Deep Learning, CNN

03/2024 – 04/2024

Integrated Complaint Tracking and Management System
Designed and implemented a Complaint Management System to streamline the process of lodging, tracking, and resolving user complaints.
Languages/Technologies Used: HTML, CSS, JavaScript, PHP, MySQL

12/2022 – 01/2023

Automated Vehicle Number Plate Recognition System Using OpenCV and OCR
Developed an vehicle number plate recognition system using OpenCV for image processing and Tesseract OCR for character extraction. The system detects and reads license plates in real time, aiding in vehicle identification and traffic management.
Languages/Technologies Used: Python, OpenCV, Tesseract OCR, NumPy, Computer Vision Techniques

Languages

English
Proficient Level

Hindi
Conversational Level

Kannada
Native Level

Awards

3rd Place
Debugging in C Programming Competition

Runner-up
Inter-College Chess Competition

Certificates

Full Stack Web Development Internship Certificate
Makerble Solution Pvt. Ltd

Front-End Developer
Pentagon Space

Declaration

I hereby declare that the above information is true to the best of my knowledge and belief.
